## STIFEL, NICOLAUS & COMPANY, INCORPORATED

### Notes to Consolidated Statement of Financial Condition (Unaudited) June 30, 2018

#### NOTE 1 – Nature of Operations and Basis of Presentation

##### *Nature of Operations*

Stifel, Nicolaus & Company, Incorporated (“Stifel”), is principally engaged in brokerage, securities trading, investment banking, investment advisory, and related financial services throughout the United States. We provide securities brokerage services, including the sale of equities, mutual funds, fixed income products, insurance, and banking products to our clients. We are a wholly-owned subsidiary of Stifel Financial Corp. (the “Parent”). We are a registered broker-dealer and investment advisor under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), a member of the New York Stock Exchange, Inc. and the Financial Industry Regulatory Authority, Inc. (“FINRA”), and National Futures Association (“NFA”). Through our membership in the NFA, we are regulated by the Commodity Futures Trading Commission (“CFTC”).

On March 19, 2018, the Parent acquired Ziegler Wealth Management (“Ziegler”), a privately held investment bank, capital markets and proprietary investments firm that has 55 private client advisors in five states that manage approximately \$5 billion in client assets. Ziegler provides its clients with capital raising, strategic advisory services, equity and fixed income sales & trading and research. The Ziegler businesses were integrated with Stifel immediately after the acquisition. At the time of the integration, the Parent contributed the net assets of Ziegler to Stifel. See Note 6 for additional information on the Ziegler acquisition.

##### *Basis of Presentation*

The consolidated statement of financial condition includes Stifel Nicolaus and its wholly-owned subsidiaries. All material inter-company accounts and transactions have been eliminated. Unless otherwise indicated, the terms “we,” “us,” “our,” or “our company” in this report refer to Stifel, Nicolaus & Company, Incorporated and its wholly-owned subsidiaries.

The accompanying consolidated statement of financial condition has been prepared in conformity with U.S. generally accepted accounting principles, which require management to make certain estimates and assumptions that affect the reported amounts. We consider significant estimates, which are most susceptible to change and impacted significantly by judgments, assumptions, and estimates, to be: valuation of financial instruments; accrual for contingencies; fair value of goodwill and intangible assets; and tax reserves. Actual results could differ from those estimates.

##### *Consolidation Policies*

The consolidated statement of financial condition includes the accounts of Stifel Nicolaus and its subsidiaries. We also have investments or interests in other entities for which we must evaluate whether to consolidate by determining whether we have a controlling financial interest or are considered to be the primary beneficiary. In determining whether to consolidate these entities, we evaluate whether the entity is a voting interest entity or a variable interest entity (“VIE”).

***Voting Interest Entity.*** Voting interest entities are entities that have (i) total equity investment at risk sufficient to fund expected future operations independently, and (ii) equity holders who have the obligation to absorb losses or receive residual returns and the right to make decisions about the entity’s activities. We consolidate voting interest entities when we determine that there is a controlling financial interest, usually ownership of all, or a majority of, the voting interest.

***Variable Interest Entity.*** VIEs are entities that lack one or more of the characteristics of a voting interest entity. We are required to consolidate VIEs in which we are deemed to be the primary beneficiary. The primary beneficiary is defined as the entity that has a variable interest, or a combination of variable interests, that maintains control and receives benefits or will absorb losses that are not pro rata with its ownership interests.

## STIFEL, NICOLAUS & COMPANY, INCORPORATED

### Notes to Consolidated Statement of Financial Condition (Unaudited) June 30, 2018

The determination as to whether an entity is a VIE is based on the structure and nature of the entity. We also consider other characteristics, such as the ability to influence the decision-making relative to the entity's activities and how the entity is financed. With the exception of entities eligible for the deferral codified in Financial Accounting Standards Board ("FASB") Accounting Standards Update ("ASU") No. 2010-10, "Consolidation: Amendments for Certain Investment Funds," ("ASU 2010-10") (generally asset managers and investment companies), ASC 810 states that a controlling financial interest in an entity is present when an enterprise has a variable interest, or combination of variable interests, that have both the power to direct the activities of the entity that most significantly impact the entity's economic performance and the obligation to absorb losses of the entity or the rights to receive benefits from the entity that could potentially be significant to the entity.

Entities meeting the deferral provision defined by ASU 2010-10 are evaluated under the historical VIE guidance. Under the historical guidance, a controlling financial interest in an entity is present when an enterprise has a variable interest, or combination of variable interests, that will absorb a majority of the entity's expected losses, receive a majority of the entity's expected residual returns, or both. The enterprise with a controlling financial interest, known as the primary beneficiary, consolidates the VIE.

We determine whether we are the primary beneficiary of a VIE by first performing a qualitative analysis of the VIE's control structure, expected benefits and losses and expected residual returns. This analysis includes a review of, among other factors, the VIE's capital structure, contractual terms, which interests create or absorb benefits or losses, variability, related party relationships, and the design of the VIE. Where a qualitative analysis is not conclusive, we perform a quantitative analysis. We reassess our initial evaluation of an entity as a VIE and our initial determination of whether we are the primary beneficiary of a VIE upon the occurrence of certain reconsideration events. See Note 15 for additional information on variable interest entities.

#### **NOTE 2 – Summary of Significant Accounting Policies**

##### ***Cash and Cash Equivalents***

Cash equivalents included money market mutual funds and highly liquid investments, other than those used for trading purposes, with original maturities of 90 days or less. Due to the short-term nature of these instruments, carrying value approximates their fair value.

##### ***Cash Segregated for Regulatory Purposes***

We are subject to Rule 15c3-3 under the Securities Exchange Act of 1934, which requires our company to maintain cash or qualified securities in a segregated reserve account for the exclusive benefit of its clients. In accordance with Rule 15c3-3, our company has portions of its cash segregated for the exclusive benefit of clients at June 30, 2018.

##### ***Brokerage Client Receivables, net***

Brokerage client receivables, primarily consisting of amounts due on cash and margin transactions collateralized by securities owned by clients, are charged interest at rates similar to other such loans made throughout the industry. The receivables are reported at their outstanding principal balance net of allowance for doubtful accounts. When a brokerage client receivable is considered to be impaired, the amount of the impairment is generally measured based on the fair value of the securities acting as collateral, which is measured based on current prices from independent sources such as listed market prices or broker-dealer price quotations. Securities owned by customers, including those that collateralize margin or other similar transactions, are not reflected in the consolidated statement of financial condition.

##### ***Securities Borrowed and Securities Loaned***

Securities borrowed require our company to deliver cash to the lender in exchange for securities and are included in receivables from brokers, dealers, and clearing organizations in the consolidated statement of financial condition. For securities loaned, we generally receive collateral in the form of cash in an amount in excess of the market value of securities loaned. Securities loaned are included in payables to brokers, dealers, and clearing organizations in the consolidated statement of financial condition. We monitor the market value of securities borrowed and loaned on a daily basis, with additional collateral obtained or refunded as necessary.

## STIFEL, NICOLAUS & COMPANY, INCORPORATED

### Notes to Consolidated Statement of Financial Condition (Unaudited) June 30, 2018

Substantially all of these transactions are executed under master netting agreements, which gives us right of offset in the event of counterparty default; however, such receivables and payables with the same counterparty are not set-off in the consolidated statement of financial condition. See Note 9 for additional information on financial assets and liabilities that are subject to offset.

#### *Securities Purchased Under Agreements to Resell and Repurchase Agreements*

Securities purchased under agreements to resell (“reverse repurchase agreements”) are collateralized financing transactions that are recorded at their contractual amounts plus accrued interest. We obtain control of collateral with a market value equal to or in excess of the principal amount loaned and accrued interest under reverse repurchase agreements. These agreements are short-term in nature and are generally collateralized by U.S. government securities, U.S. government agency securities, and corporate bonds. We value collateral on a daily basis, with additional collateral obtained when necessary to minimize the risk associated with this activity.

Securities sold under agreements to repurchase (“repurchase agreements”) are collateralized financing transactions that are recorded at their contractual amounts plus accrued interest. We make delivery of securities sold under agreements to repurchase and monitor the value of collateral on a daily basis. When necessary, we will deliver additional collateral.

#### *Financial Instruments*

We measure certain financial assets and liabilities at fair value on a recurring basis, including financial instruments owned and investments and financial instruments sold, but not yet purchased. Other than those separately discussed in the notes to the consolidated statement of financial condition, the remaining financial instruments are generally short-term in nature and their carrying values approximate fair value.

#### *Fair Value Hierarchy*

The fair value of a financial instrument is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e. “the exit price”) in an orderly transaction between market participants at the measurement date. We have categorized our financial instruments measured at fair value into a three-level classification in accordance with Topic 820, “*Fair Value Measurement*” which established a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability developed based on market data obtained from independent sources. Unobservable inputs reflect our assumptions that market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The hierarchy is broken down into three levels based on the transparency of inputs as follows:

Level 1 – Quoted prices (unadjusted) are available in active markets for identical assets or liabilities as of the measurement date. A quoted price for an identical asset or liability in an active market provides the most reliable fair value measurement because it is directly observable to the market.

Level 2 – Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the measurement date. The nature of these financial instruments include instruments for which quoted prices are available but traded less frequently, derivative instruments whose fair value have been derived using a model where inputs to the model are directly observable in the market, or can be derived principally from or corroborated by observable market data, and instruments that are fair valued using other financial instruments, the parameters of which can be directly observed.

Level 3 – Instruments that have little to no pricing observability as of the measurement date. These financial instruments do not have two-way markets and are measured using management’s best estimate of fair value, where the inputs into the determination of fair value require significant management judgment or estimation.

#### *Valuation of Financial Instruments*

When available, we use observable market prices, observable market parameters, or broker or dealer prices (bid and ask prices) to derive the fair value of financial instruments. In the case of financial instruments transacted on recognized exchanges, the observable market prices represent quotations for completed transactions from the exchange on which the financial instrument is principally traded.

## STIFEL, NICOLAUS & COMPANY, INCORPORATED

### Notes to Consolidated Statement of Financial Condition (Unaudited) June 30, 2018

A substantial percentage of the fair value of our financial instruments are based on observable market prices, observable market parameters, or derived from broker or dealer prices. The availability of observable market prices and pricing parameters can vary from product to product. Where available, observable market prices and pricing or market parameters in a product may be used to derive a price without requiring significant judgment. In certain markets, observable market prices or market parameters are not available for all products, and fair value is determined using techniques appropriate for each particular product. These techniques involve some degree of judgment.

For investments in illiquid or privately held securities that do not have readily determinable fair values, the determination of fair value requires us to estimate the value of the securities using the best information available. Among the factors we consider in determining the fair value of investments are the cost of the investment, terms and liquidity, developments since the acquisition of the investment, the sales price of recently issued securities, the financial condition and operating results of the issuer, earnings trends and consistency of operating cash flows, the long-term business potential of the issuer, the quoted market price of securities with similar quality and yield that are publicly traded, and other factors generally pertinent to the valuation of investments. In instances where a security is subject to transfer restrictions, the value of the security is based primarily on the quoted price of a similar security without restriction but may be reduced by an amount estimated to reflect such restrictions. The fair value of these investments is subject to a high degree of volatility and may be susceptible to significant fluctuation in the near term and the differences could be material.

The degree of judgment used in measuring the fair value of financial instruments generally correlates to the level of pricing observability. Pricing observability is impacted by a number of factors, including the type of financial instrument, whether the financial instrument is new to the market and not yet established, and the characteristics specific to the transaction. Financial instruments with readily available active quoted prices for which fair value can be measured from actively quoted prices generally will have a higher degree of pricing observability and a lesser degree of judgment used in measuring fair value. Conversely, financial instruments rarely traded or not quoted will generally have less, or no, pricing observability and a higher degree of judgment used in measuring fair value. See Note 4 for additional information on how we value our financial instruments.

#### ***Investments***

The fair value of marketable investments is generally based on either quoted market or dealer prices. The fair value of non-marketable securities is based on management's estimate using the best information available, which generally consists of quoted market prices for similar securities and internally developed discounted cash flow models.

Investments in the consolidated statement of financial condition contain investments in securities that are marketable and securities that are not readily marketable. These investments are not included in our inventory and represent the acquiring and disposing of debt or equity instruments for our benefit and not for resale to our customers.

#### ***Goodwill and Intangible Assets***

Goodwill represents the cost of acquired businesses in excess of the fair value of the related net assets acquired. We test goodwill for impairment on an annual basis and on an interim basis when certain events or circumstances exist. For both the annual and interim tests, we have the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of our company is less than its carrying amount. If after assessing the totality of events or circumstances, we determine it is more likely than not that the fair value of our company is greater than its carrying amount, then performing the two-step impairment test is not required. However, if we conclude otherwise, we are then required to perform the first step of the two-step impairment test. Goodwill impairment is determined by comparing the estimated fair value of our company with its respective carrying value. If the estimated fair value exceeds the carrying value, goodwill is not deemed to be impaired. If the estimated fair value is below carrying value, however, further analysis is required to determine the amount of the impairment. Additionally, if the carrying value is zero or a negative value and it is determined that it is more likely than not the goodwill is impaired, further analysis is required. The estimated fair value of our company is derived based on valuation techniques we believe market participants would use. We have elected December 31 as our annual impairment testing date.

Identifiable intangible assets, which are amortized over their estimated useful lives, are tested for potential impairment whenever events or changes in circumstances suggest that the carrying value of an asset or asset group may not be fully recoverable. See Note 6 for additional information on goodwill and intangible assets.

## STIFEL, NICOLAUS & COMPANY, INCORPORATED

### Notes to Consolidated Statement of Financial Condition (Unaudited) June 30, 2018

#### *Loans and Advances to Financial Advisors and Other Employees, Net*

We offer transition pay, principally in the form of upfront loans, to financial advisors and certain key revenue producers as part of our company's overall growth strategy. We monitor and compare individual financial advisor production to each loan issued to ensure future recoverability. If the individual leaves before the term of the loan expires or fails to meet certain performance standards, the individual is required to repay the balance. In determining the allowance for doubtful receivables from former employees, management considers the facts and circumstances surrounding each receivable, including the amount of the unforgiven balance, the reasons for the terminated employment relationship, and the former employees' overall financial situation.

#### *Legal Loss Allowances*

We have established reserves for potential losses that are probable and reasonably estimable that may result from pending and potential legal actions, investigations, and regulatory proceedings. In many cases, however, it is inherently difficult to determine whether any loss is probable or even possible or to estimate the amount or range of any potential loss, particularly where proceedings may be in relatively early stages or where plaintiffs are seeking substantial or indeterminate damages. Matters frequently need to be more developed before a loss or range of loss can reasonably be estimated. We have, after consultation with outside legal counsel and consideration of facts currently known by management, recorded estimated losses to the extent we believe certain claims are probable of loss and the amount of the loss can be reasonably estimated. These reserves are included in accounts payable and accrued expenses in the consolidated statement of financial condition.

This determination is inherently subjective, as it requires estimates that are subject to potentially significant revision as more information becomes available and due to subsequent events. Factors considered by management in estimating our liability is the loss and damages sought by the claimant/plaintiff, the merits of the claim, the amount of loss in the client's account, the possibility of wrongdoing on the part of the employee of our company, the total cost of defending the litigation, the likelihood of a successful defense against the claim, and the potential for fines and penalties from regulatory agencies. Results of litigation and arbitration are inherently uncertain, and management's assessment of risk associated therewith is subject to change as the proceedings evolve.

#### *Leases*

We lease office space and equipment under operating leases. The lease term commences on the earlier of the date when we become legally obligated for the rent payments or the date on which we take possession of the property. For tenant improvement allowances and rent holidays, we record a deferred rent liability in accounts payable and accrued expenses in the consolidated statement of financial condition.

#### *Income Taxes*

On December 22, 2017, the Tax Cuts and Jobs Act of 2017 ("Tax Legislation") was signed into law making significant changes to the Internal Revenue Code. Changes include, but are not limited to, a corporate tax rate decrease from 35% to 21% effective for tax years beginning after December 31, 2017, the transition of U.S international taxation from a worldwide tax system to a territorial system, and a one-time transition tax on the mandatory deemed repatriation of cumulative foreign earnings as of December 31, 2017.

We are included in the consolidated federal and certain state income tax returns filed by the Parent. Our portion of the consolidated current income tax liability, computed on a separate return basis pursuant to a tax sharing agreement and our stand-alone tax liability or receivable are included in the consolidated statement of financial condition.

We generally compute income taxes using the asset and liability method, under which deferred income taxes are provided for the temporary differences between the financial statement carrying amounts and the tax basis of our company's assets and liabilities. We establish a valuation allowance for deferred tax assets if it is more likely than not that these items will either expire before we are able to realize their benefits, or that future deductibility is uncertain.

We recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the consolidated statement of financial condition from such a position are measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement.

**STIFEL, NICOLAUS & COMPANY, INCORPORATED**

**Notes to Consolidated Statement of Financial Condition (Unaudited)  
June 30, 2018**

***Recently Issued Accounting Guidance***

*Goodwill Impairment Testing*

In January 2017, the FASB issued ASU 2017-04, “Intangibles – Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment,” which simplifies the subsequent measurement of goodwill and eliminates Step 2 from the goodwill impairment test. Under the accounting update, the annual, or interim, goodwill impairment test is performed by comparing the fair value of a reporting unit with its carrying amount, and an impairment charge should be recognized for the amount by which the carrying amount exceeds the reporting unit’s fair value; however, the loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. The accounting update is effective for annual or any interim impairment tests in fiscal years beginning after December 15, 2019 (January 1, 2020 for our company) and early adoption is permitted. We are currently evaluating the impact of the accounting update, but the adoption is not expected to have a material impact on our consolidated financial statements.

*Leases*

In February 2016, the FASB issued ASU 2016-02, “Leases – (Topic 842)” that requires for leases longer than one year, a lessee recognize in the statements of financial condition a right-of-use asset, representing the right to use the underlying asset for the lease term, and a lease liability, representing the liability to make lease payments. The accounting update also requires that for finance leases, a lessee recognize interest expense on the lease liability, separately from the amortization of the right-of-use asset in the statements of earnings, while for operating leases, such amounts should be recognized as a combined expense. In addition, this accounting update requires expanded disclosures about the nature and terms of lease agreements.

The accounting update is effective for fiscal years beginning after December 15, 2018 (January 1, 2019 for our company) under a modified retrospective approach and early adoption is permitted. The Company’s implementation efforts include reviewing existing leases and service contracts, which may include embedded leases. Upon adoption, our company expects a gross up on its consolidated statements of financial condition upon recognition of the right-of-use assets and lease liabilities and does not expect the amount of the gross up to have a material impact on its financial condition.

**NOTE 3 – Receivables From and Payables to Brokers, Dealers and Clearing Organizations**

Amounts receivable from brokers, dealers and clearing organizations at June 30, 2018, included (*in thousands*):

Receivable from clearing organizations	\$	378,939
Deposits paid for securities borrowed		137,189
Securities failed to deliver		62,652
	\$	<u>578,780</u>

Amounts payable to brokers, dealers and clearing organizations at June 30, 2018, included (*in thousands*):

Deposits received from securities loaned	\$	601,133
Securities failed to receive		71,795
Payable to affiliated broker-dealers		51,240
Payable to clearing organizations		64
	\$	<u>724,232</u>

Deposits paid for securities borrowed approximate the market value of the securities. Securities failed to deliver and receive represent the contract value of securities that have not been delivered or received on settlement date.

## STIFEL, NICOLAUS & COMPANY, INCORPORATED

### Notes to Consolidated Statement of Financial Condition (Unaudited) June 30, 2018

#### NOTE 4 – Fair Value Measurements

We measure certain financial assets and liabilities at fair value on a recurring basis, including financial instruments owned, investments and financial instruments sold, but not yet purchased.

We generally utilize third-party pricing services to value Level 1 and Level 2 financial assets and liabilities. We review the methodologies and assumptions used by the third-party pricing services and evaluate the values provided, principally by comparison with other available market quotes for similar instruments and/or analysis based on internal models using available third-party market data. We may occasionally adjust certain values provided by the third-party pricing service when we believe, as the result of our review, that the adjusted price most appropriately reflects the fair value of the particular security.

Following are descriptions of the valuation methodologies and key inputs used to measure financial assets and liabilities recorded at fair value. The descriptions include an indication of the level of the fair value hierarchy in which the assets or liabilities are classified.

#### *Financial Instruments Owned*

When available, the fair value of financial instruments are based on quoted prices (unadjusted) in active markets and reported in Level 1. Level 1 financial instruments include highly liquid instruments with quoted prices (unadjusted), such as equity securities listed in active markets, corporate fixed income securities, and U.S. government securities.

If quoted prices are not available, fair values are obtained from pricing services, broker quotes, or other model-based valuation techniques with observable inputs such as the present value of estimated cash flows and reported as Level 2. The nature of these financial instruments include instruments for which quoted prices are available but traded less frequently, instruments whose fair value have been derived using a model where inputs to the model are directly observable in the market, or can be derived principally from or corroborated by observable market data, and instruments that are fair valued using other financial instruments, the parameters of which can be directly observed. Level 2 financial instruments generally include U.S. government agency securities, mortgage-backed securities, corporate fixed income and equity securities infrequently traded, state and municipal obligations, sovereign debt, and asset-backed securities.

Level 3 financial instruments have little to no pricing observability as of the report date. These financial instruments do not have active two-way markets and are measured using management's best estimate of fair value, where the inputs into the determination of fair value require significant management judgment or estimation. We have identified Level 3 financial instruments to include asset-backed securities and equity securities with unobservable pricing inputs. We value these financial instruments, where there was less frequent or nominal market activity or when we were able to obtain only a single broker quote, using prices from comparable securities.

#### *Investments*

Investments carried at fair value primarily include auction-rate securities ("ARS") and corporate equity securities.

Corporate equity securities are valued based on quoted prices in active markets and reported in Level 1.

ARS are valued based upon our expectations of issuer redemptions and using internal discounted cash flow models that utilize unobservable inputs. ARS are reported as Level 3 assets.

#### *Investments in Funds That Are Measured at Net Asset Value Per Share*

Investments at fair value include investments in funds, including certain money market funds that are measured at net asset value ("NAV"). The Company uses NAV to measure the fair value of its fund investments when (i) the fund investment does not have a readily determinable fair value and (ii) the NAV of the investment fund is calculated in a manner consistent with the measurement principles of investment company accounting, including measurement of the underlying investments at fair value.

**STIFEL, NICOLAUS & COMPANY, INCORPORATED**

**Notes to Consolidated Statement of Financial Condition (Unaudited)  
June 30, 2018**

The Company's investments in funds measured at NAV include mutual funds and partnership interests. The general and limited partnership interests in investment partnerships were primarily valued based upon NAVs received from third-party fund managers. The various partnerships are investment companies, which record their underlying investments at fair value based on fair value policies established by management of the underlying fund. Fair value policies at the underlying fund generally require the funds to utilize pricing/valuation information, including independent appraisals, from third-party sources. However, in some instances, current valuation information for illiquid securities or securities in markets that are not active may not be available from any third-party source or fund management may conclude that the valuations that are available from third-party sources are not reliable. In these instances, fund management may perform model-based analytical valuations that may be used as an input to value these investments.

The table below presents the fair value of our investments in, and unfunded commitments to, funds that are measured at NAV at June 30, 2018 (*in thousands*):

	<b>Fair value of investments</b>	<b>Unfunded commitments</b>
Mutual funds	\$ 10,060	\$ —
Partnership interests	1,058	154
<b>Total</b>	<b>\$ 11,118</b>	<b>\$ 154</b>

*Financial Instruments Sold, But Not Yet Purchased*

Financial instruments sold but not purchased are recorded at fair value based on quoted prices in active markets and other observable market data are reported as Level 1. Financial instruments sold but not yet purchased include highly liquid instruments with quoted prices such as U.S. government securities, corporate fixed income securities, and equity securities listed in active markets.

If quoted prices are not available, fair values are obtained from pricing services, broker quotes, or other model-based valuation techniques with observable inputs such as the present value of estimated cash flows and reported as Level 2. The nature of these financial instruments include instruments for which quoted prices are available but traded less frequently, instruments whose fair value have been derived using a model where inputs to the model are directly observable in the market, or can be derived principally from or corroborated by observable market data, and instruments that are fair valued using other financial instruments, the parameters of which can be directly observed. Level 2 financial instruments generally include U.S. government agency securities, mortgage-backed securities, corporate fixed income securities not actively traded, and sovereign debt.

**STIFEL, NICOLAUS & COMPANY, INCORPORATED**

**Notes to Consolidated Statement of Financial Condition (Unaudited)**  
**June 30, 2018**

The following table summarizes the valuation of our financial instruments by pricing observability levels as of June 30, 2018 (*in thousands*):

	Total	Level 1	Level 2	Level 3
<b>Assets:</b>				
<b>Financial instruments owned:</b>				
U.S. government securities	\$ 19,943	\$ 19,943	\$ —	\$ —
U.S. government agency securities	138,884	—	138,884	—
Mortgage-backed securities:				
Agency	362,939	—	362,939	—
Non-agency	20,661	—	20,660	1
Asset-backed securities	114,350	—	113,995	355
Corporate securities:				
Fixed income securities	342,024	904	341,120	—
Equity securities	16,225	15,936	166	123
Sovereign debt	48,088	—	48,088	—
State and municipal securities	158,352	—	158,352	—
Total financial instruments owned	1,221,466	36,783	1,184,204	479
<b>Investments:</b>				
Corporate equity securities	4,616	4,616	—	—
Auction rate securities:				
Equity securities	25,303	—	—	25,303
Municipal securities	846	—	—	846
Other	6	—	6	—

**STIFEL, NICOLAUS & COMPANY, INCORPORATED**

**Notes to Consolidated Statement of Financial Condition (Unaudited)  
June 30, 2018**

The following table summarizes the changes in fair value carrying values associated with Level 3 financial instruments during the six months ended June 30, 2018 (*in thousands*):

	Financial Instruments Owned			Investments	
	Mortgage-backed securities – Non-agency	Asset-Backed Securities	Equity Securities	Auction-Rate Securities – Equity	Auction-Rate Securities – Municipal
<b>Balance at January 1, 2018</b>	<b>\$ 1</b>	<b>\$ 357</b>	<b>\$ 253</b>	<b>\$ 34,789</b>	<b>\$ 846</b>
Unrealized gains/(losses)	—	3	(130)	89	—
Realized gains	—	—	—	—	—
Sales	—	—	—	—	—
Redemptions	—	(5)	—	(9,575)	—
Transfers in/(out) of Level 3	—	—	—	—	—
Net change	—	(2)	(130)	(9,486)	—
<b>Balance at June 30, 2018</b>	<b>\$ 1</b>	<b>\$ 355</b>	<b>\$ 123</b>	<b>\$ 25,303</b>	<b>\$ 846</b>

The results included in the table above are only a component of the overall investment strategies of our company. The table above does not present Level 1 or Level 2 valued assets or liabilities. The changes to our company's Level 3 classified instruments during the six months ended June 30, 2018 were principally a result of redemptions of ARS.

The following table summarizes quantitative information related to the significant unobservable inputs utilized in our company's Level 3 recurring fair value measurements as of June 30, 2018.

	Valuation technique	Unobservable input	Range	Weighted Average
<b>Investments:</b>				
Auction rate securities:				
Equity securities	Discounted cash flow	Discount rate	1.3% - 10.2%	6.1%
		Workout period	2-3 years	2.6 years
Municipal securities	Discounted cash flow	Discount rate	0.6% - 9.9%	3.4%
		Workout period	1-4 years	1.9 years

The fair value of certain Level 3 assets was determined using various methodologies as appropriate, including third-party pricing vendors, broker quotes and market and income approaches. These inputs are evaluated for reasonableness through various procedures, including due diligence reviews of third-party pricing vendors, variance analyses, consideration of current market environment and other analytical procedures.

The fair value for our auction-rate securities was determined using an income approach based on an internally developed discounted cash flow model. The discounted cash flow model utilizes two significant unobservable inputs: discount rate and workout period. The discount rate was calculated using credit spreads of the underlying collateral or similar securities. The workout period was based on an assessment of publicly available information on efforts to re-establish functioning markets for these securities and our company's own redemption experience. Significant increases in any of these inputs in isolation would result in a significantly lower fair value. On an on-going basis, management verifies the fair value by reviewing the appropriateness of the discounted cash flow model and its significant inputs.

*Transfers Within the Fair Value Hierarchy*

We assess our financial instruments on a quarterly basis to determine the appropriate classification within the fair value hierarchy. Transfers between fair value classifications occur when there are changes in pricing observability levels. Transfers of financial instruments among the levels are deemed to occur at the beginning of the reporting period. There were \$0.6 million of transfers of financial assets from Level 2 to Level 1 during the six months ended June 30, 2018. There were \$0.6 million of transfers of financial assets from Level 1 to Level 2 during the six months ended June 30, 2018 primarily related to corporate fixed income securities for which there were low volumes of recent trade activity observed. There were no transfers into or out of Level 3 during the six months ended June 30, 2018.

**STIFEL, NICOLAUS & COMPANY, INCORPORATED**

**Notes to Consolidated Statement of Financial Condition (Unaudited)  
June 30, 2018**

*Financial Instruments Not Measured at Fair Value*

There are certain financial instruments included in our consolidated statement of financial condition that are not measured at fair value on a recurring basis, but nevertheless are recorded at amounts that approximate fair value due to their liquid or short-term nature. These financial assets and liabilities include: cash and cash equivalents, cash segregated for regulatory purposes, receivables from brokerage clients, receivables from brokers, dealers and clearing organizations, securities purchased under agreements to resell, payables from brokerage clients, payables from brokers, dealers and clearing organizations, and securities sold under agreements to repurchase.

*Short-term borrowings*

The carrying amount of short-term borrowings approximates fair value due to the relative short-term nature of such borrowings, some of which are day-to-day.

*Liabilities Subordinated to Claims of General Creditors*

The fair value of subordinated debt was measured using the interest rates commensurate with borrowings of similar terms. At June 30, 2018, the carrying value and fair value of the subordinated debt is \$35.0 million and \$15.2 million, respectively. See Note 8 for further discussion of the subordinated debt.

**NOTE 5 – Financial Instruments Owned and Financial Instruments Sold, But Not Yet Purchased**

The components of financial instruments owned and financial instruments sold, but not yet purchased at June 30, 2018 are as follows (*in thousands*):

<b>Financial instruments owned:</b>	
U.S. government securities	\$ 19,943
U.S. government agency securities	138,884
Mortgage-backed securities:	
Agency	362,939
Non-agency	20,661
Asset-backed securities	114,350
Corporate securities:	
Fixed income securities	342,024
Equity securities	16,225
Sovereign debt	48,088
State and municipal securities	158,352
	<b>\$ 1,221,466</b>
<b>Financial instruments sold, but not yet purchased:</b>	
U.S. government securities	\$ 444,941
U.S. government agency securities	30,623
Agency mortgage-backed securities	143,284
Corporate securities:	
Fixed income securities	243,333
Equity securities	23,241
Sovereign debt	18,584
	<b>\$ 904,006</b>

At June 30, 2018, financial instruments owned in the amount of \$838.6 million were pledged as collateral (on a settlement-date basis) for our repurchase agreements and short-term borrowings.

Financial instruments sold, but not yet purchased represent obligations of our company to deliver the specified security at the contracted price, thereby creating a liability to purchase the security in the market at prevailing prices in future periods. We are obligated to acquire the securities sold short at prevailing market prices, which may exceed the amount reflected in the consolidated statement of financial condition.

**STIFEL, NICOLAUS & COMPANY, INCORPORATED**

**Notes to Consolidated Statement of Financial Condition (Unaudited)  
June 30, 2018**

**NOTE 6 – Goodwill and Intangible Assets**

We test goodwill for impairment on an annual basis and on an interim basis when certain events or circumstances exist. Our annual goodwill impairment testing was completed on December 31, 2017, with no impairment identified.

On March 19, 2018, the Parent completed the acquisition of Ziegler. The Ziegler businesses were integrated with Stifel immediately after the acquisition. The acquisition was accounted for under the acquisition method of accounting in accordance with ASC 805, “Business Combinations.” Accordingly, goodwill was measured as the excess of the acquisition-date fair value of the consideration transferred over the amount of acquisition-date identifiable assets acquired net of assumed liabilities. We recorded \$27.6 million of goodwill and intangibles in the consolidated statement of financial condition, which has been allocated to our company’s Global Wealth Management and Institutional Group segments. The allocation of the purchase price of Ziegler is preliminary and will be finalized upon completion of the analysis of the fair values of the net assets of Ziegler as of the acquisition date and the identified intangible assets. The final goodwill recorded on the consolidated statement of financial condition may differ from that reflected herein as a result of future measurement period adjustments and the recording of identified intangible assets. See Note 1 for additional information regarding the acquisition of Ziegler.

The goodwill represents the value expected from the synergies created through the operational enhancement benefits that will result from the integration of the Ziegler business and of the hired financial advisors and the conversion of the customer accounts to our platform. Goodwill is expected to be deductible for federal income tax purposes.

The carrying amount of intangible assets is presented in the following table (*in thousands*):

<b>Balance at January 1, 2018</b>	<b>\$ 11,710</b>
Additions	12,000
Amortization	(1,309)
<b>Balance at June 30, 2018</b>	<b>\$ 22,401</b>

Amortizable intangible assets consist of acquired customer relationships, trade names, and an estimate of intangibles from the Ziegler acquisition that are amortized over their contractual or determined useful lives. Intangible assets subject to amortization as of June 30, 2018 were as follows (*in thousands*):

	Gross carrying value	Accumulated Amortization	Net
Customer relationships	\$ 30,493	\$ 24,130	\$ 6,363
Trade name	8,780	4,542	4,238
Estimated Ziegler intangibles <sup>(1)</sup>	12,000	200	11,800
	<u>\$ 51,273</u>	<u>\$ 28,872</u>	<u>\$ 22,401</u>

<sup>(1)</sup> See discussion regarding the allocation of the estimated goodwill and intangibles recorded for the Ziegler acquisition.

**NOTE 7 – Short-Term Borrowings**

Our short-term financing is generally obtained through short-term bank line financing on an uncommitted, secured basis, securities lending arrangements, and committed bank line financing on an unsecured basis. We borrow from various banks on a demand basis with company-owned and customer securities pledged as collateral. The value of customer-owned securities used as collateral is not reflected in the consolidated statement of financial condition.

Our uncommitted secured lines of credit at June 30, 2018, totaled \$1.0 billion with six unaffiliated banks and are dependent on having appropriate collateral, as determined by the bank agreements, to secure an advance under the line. The availability of our uncommitted lines is subject to approval by the individual banks each time an advance is requested and may be denied. Our peak daily borrowing on our uncommitted secured lines was \$391.0 million during the six months ended June 30, 2018. There are no compensating balance requirements under these arrangements. Any borrowings on secured lines of credit are day-to-day and are generally utilized to finance certain fixed income securities. At June 30, 2018, our outstanding uncommitted secured lines of credit of \$243.0 million were collateralized by company-owned securities valued at \$285.2 million.

**STIFEL, NICOLAUS & COMPANY, INCORPORATED**

**Notes to Consolidated Statement of Financial Condition (Unaudited)  
June 30, 2018**

We have a committed, secured Credit Agreement, as amended, (the “Agreement”) with Stifel Bank and Trust (“Stifel Bank”), a wholly-owned subsidiary of the Parent. Under the terms of the Agreement, Stifel Bank is providing our company with a \$290.0 million revolving credit facility. The credit facility expires in January 2019. The borrowings are collateralized by company-owned securities and receivables. The applicable interest rate under the revolving credit facility is calculated as a per annum rate equal to the Eurocurrency Rate plus 1.50%. At June 30, 2018, we had no advances on our revolving credit facility and were in compliance with all covenants.

In June 2018, we entered into a 364-day Credit Agreement with a maturity date of June 2019 in which the lenders are number of financial institutions. The committed unsecured borrowing facility provides for maximum borrowings of up to \$250.0 million at variable rates of interest. At June 30, 2018, we had no advances on our credit facility and were in compliance with all covenants.

**NOTE 8 – Liabilities Subordinated to Claims of General Creditors**

In September 2010, FINRA approved our amended \$35.0 million subordinated loan agreement with the Parent and its inclusion in our net capital computation. The loan is callable on September 30, 2035 and bears interest at a floating rate equal to three-month LIBOR plus 1.70% per annum. At June 30, 2018, the fair value of the liabilities subordinated to claims of general creditors using interest rates commensurate with borrowings of similar terms was \$15.2 million.

**NOTE 9 – Disclosures About Offsetting Assets and Liabilities**

The following table provides information about financial assets that are subject to offset as of June 30, 2018 (*in thousands*):

	<b>Gross amounts not offset in the Statement of Financial Condition</b>					
	<b>Gross amounts of recognized assets</b>	<b>Gross amounts offset in the Statement of Financial Condition</b>	<b>Net amounts presented in the Statement of Financial Condition</b>	<b>Amounts available for offset</b>	<b>Available collateral</b>	<b>Net amount</b>
Securities borrowing <sup>(1)</sup>	\$ 137,189	\$ —	\$ 137,189	\$ (77,501)	\$ (54,881)	\$ 4,807
Reverse repurchase agreements <sup>(2)</sup>	566,041	—	566,041	(295,077)	(266,267)	4,697
	<b>\$ 703,230</b>	<b>\$ —</b>	<b>\$ 703,230</b>	<b>\$ (372,578)</b>	<b>\$ (321,148)</b>	<b>\$ 9,504</b>

<sup>(1)</sup> Securities borrowing transactions are included in receivables from brokers, dealers, and clearing organizations on the consolidated statement of financial condition. See Note 3 for additional information on receivables from brokers, dealers, and clearing organizations.

<sup>(2)</sup> Collateral received includes securities received by our company from the counterparty. These securities are not included on the consolidated statement of financial condition unless there is an event of default. The fair value of securities pledged as collateral was \$562.4 million at June 30, 2018.

**STIFEL, NICOLAUS & COMPANY, INCORPORATED**

**Notes to Consolidated Statement of Financial Condition (Unaudited)  
June 30, 2018**

The following table provides information about financial liabilities that are subject to offset as of June 30, 2018 (*in thousands*):

	Gross amounts of recognized assets	Gross amounts offset in the Statement of Financial Condition	Net amounts presented in the Statement of Financial Condition	Gross amounts not offset in the Statement of Financial Condition		
				Amounts available for offset	Available collateral	Net amount
Securities lending <sup>(3)</sup>	\$ (601,133)	\$ —	\$ (601,133)	\$ 77,501	\$ 502,155	\$ (21,477)
Repurchase agreements <sup>(4)</sup>	(514,334)	—	(514,334)	295,077	219,257	—
	<b>\$ (1,115,467)</b>	<b>\$ —</b>	<b>\$ (1,115,467)</b>	<b>\$ 372,578</b>	<b>\$ 721,412</b>	<b>\$ (21,477)</b>

<sup>(3)</sup> Securities lending transactions are included in payables to brokers, dealers, and clearing organizations on the consolidated statement of financial condition. See Note 3 for additional information on payables to brokers, dealers, and clearing organizations.

<sup>(4)</sup> Collateral pledged includes the fair value of securities pledged by our company to the counter party. These securities are included on the consolidated statement of financial condition unless we default. Collateral pledged by our company to the counter party includes U.S. government agency securities, U.S. government securities, and corporate fixed income securities with market values of \$540.7 million.

For financial statement purposes, we do not offset our repurchase agreements or securities borrowing or securities lending transactions because the conditions for netting as specified by U.S. generally accepted accounting principles are not met. Our repurchase agreements, securities borrowing and securities lending transactions are transacted under master agreements that are widely used by counterparties and that may allow for net settlements of payments in the normal course as well as offsetting of all contracts with a given counterparty in the event of bankruptcy or default of one of the two parties to the transaction. Although not offset on the consolidated statement of financial condition, these transactions are included in the preceding table.

**NOTE 10 – Commitments, Guarantees and Contingencies**

*Broker-Dealer Commitments and Guarantees*

In the normal course of business, we enter into underwriting commitments. Settlement of transactions relating to such underwriting commitments, which were open at June 30, 2018, had no material effect on the consolidated statement of financial condition.

We provide guarantees to securities clearinghouses and exchanges under the standard membership agreements, such that members are required to guarantee the performance of other members. Under the agreement, if another member becomes unable to satisfy its obligations to the clearinghouses, other members would be required to meet shortfalls. Our company's liability under these agreements is not quantifiable and may exceed the cash and securities it has posted as collateral. However, the potential requirement for our company to make payments under these arrangements is considered remote. Accordingly, no liability has been recognized for these arrangements.

To hedge the interest rate risk, we enter into TBA securities to be delivered at settlement dates in the future. The TBA securities are recorded at fair value and included in agency mortgage-backed securities in the financial instruments valuation table included in Note 4 to the consolidated statement of financial condition. The fair value of the TBA securities sold, not yet purchased at June 30, 2018 was \$143.3 million.

## STIFEL, NICOLAUS & COMPANY, INCORPORATED

### Notes to Consolidated Statement of Financial Condition (Unaudited) June 30, 2018

#### Concentration of Credit Risk

We provide investment, capital-raising and related services to a diverse group of domestic customers, including governments, corporations, and institutional and individual investors. Our company's exposure to credit risk associated with the non-performance of customers in fulfilling their contractual obligations pursuant to securities transactions can be directly impacted by volatile securities markets, credit markets and regulatory changes. This exposure is measured on an individual customer basis and on a group basis for customers that share similar attributes. To reduce the potential for risk concentrations, counterparty credit limits have been implemented for certain products and are continually monitored in light of changing customer and market conditions.

At June 30, 2018, two customers accounted for approximately 32% of the balance in receivables from brokerage clients, net in the consolidated statement of financial condition.

#### Operating leases

We have non-cancelable operating leases for office space. Future minimum commitments under these operating leases at June 30, 2018 are as follows (*in thousands*):

Remainder of 2018	\$	43,462
2019		82,957
2020		71,910
2021		54,701
2022		46,892
Thereafter		119,706
	\$	<u>419,628</u>

#### NOTE 11 – Legal Proceedings

Our company and its subsidiaries are named in and subject to various proceedings and claims arising primarily from our securities business activities, including lawsuits, arbitration claims, class actions, and regulatory matters. Some of these claims seek substantial compensatory, punitive, or indeterminate damages. Our company and its subsidiaries are also involved in other reviews, investigations, and proceedings by governmental and self-regulatory organizations regarding our business, which may result in adverse judgments, settlements, fines, penalties, injunctions, and other relief. We are contesting allegations in these claims, and we believe that there are meritorious defenses in each of these lawsuits, arbitrations, and regulatory investigations. In view of the number and diversity of claims against our company, the number of jurisdictions in which litigation is pending, and the inherent difficulty of predicting the outcome of litigation and other claims, we cannot state with certainty what the eventual outcome of pending litigation or other claims will be.

We have established reserves for potential losses that are probable and reasonably estimable that may result from pending and potential legal actions, investigations, and regulatory proceedings. In many cases, however, it is inherently difficult to determine whether any loss is probable or reasonably possible or to estimate the amount or range of any potential loss, particularly where proceedings may be in relatively early stages or where plaintiffs are seeking substantial or indeterminate damages. Matters frequently need to be more developed before a loss or range of loss can reasonably be estimated.

In our opinion, based on currently available information, review with outside legal counsel, and consideration of amounts provided for in our consolidated statement of financial condition with respect to these matters, the ultimate resolution of these matters will not have a material adverse impact on our financial position. However, resolution of one or more of these matters may have a material effect on our financial position in any future period, depending upon the ultimate resolution of those matters. For matters where a reserve has not been established and for which we believe a loss is reasonably possible, as well as for matters where a reserve has been recorded but for which an exposure to loss in excess of the amount accrued is reasonably possible, based on currently available information, we believe that such losses will not have a material effect on our consolidated statement of financial condition.

## STIFEL, NICOLAUS & COMPANY, INCORPORATED

### Notes to Consolidated Statement of Financial Condition (Unaudited) June 30, 2018

#### NOTE 12 – Regulatory and Capital Requirements

We operate in a highly regulated environment and are subject to capital requirements, which may limit distributions to our Parent. Distributions are subject to net capital rules. A broker-dealer that fails to comply with the SEC's Uniform Net Capital Rule (Rule 15c3-1) may be subject to disciplinary actions by the SEC and self-regulatory organizations, such as FINRA, including censures, fines, suspension, or expulsion. We have chosen to calculate our net capital under the alternative method, which prescribes that our net capital shall not be less than the greater of \$1.0 million, or two percent of aggregate debit balances (primarily receivables from customers) computed in accordance with the SEC's Customer Protection Rule (Rule 15c3-3). At June 30, 2018, we had net capital of \$302.1 million, which was 17.4% of aggregate debit items and \$267.4 million in excess of our minimum required net capital.

#### NOTE 13 – Off-Balance Sheet Credit Risk

In the normal course of business, we execute, settle, and finance customer and proprietary securities transactions. These activities expose our company to off-balance sheet risk in the event that customers or other parties fail to satisfy their obligations.

In accordance with industry practice, securities transactions generally settle within two business days after trade date. Should a customer or broker fail to deliver cash or securities as agreed, we may be required to purchase or sell securities at unfavorable market prices.

We enter into securities transactions that involve forward settlement. Gains or losses on these transactions are recognized on a trade date basis. Securities transactions involving longer settlements give rise to market risk. Our exposure to market risk is influenced by many factors, including market volatility, changes in interest rates, and type and size of the individual security.

We borrow and lend securities to facilitate the settlement process and finance transactions, utilizing customer margin securities held as collateral. We monitor the adequacy of collateral levels on a daily basis. We periodically borrow from banks on a collateralized basis utilizing firm and customer margin securities in compliance with SEC rules. Should the counterparty fail to return customer securities pledged, we are subject to the risk of acquiring the securities at prevailing market prices in order to satisfy our customer obligations. We control our exposure to credit risk by continually monitoring our counterparties' positions, and where deemed necessary, we may require a deposit of additional collateral and/or a reduction or diversification of positions. Our company sells securities it does not currently own (short sales) and is obligated to subsequently purchase such securities at prevailing market prices. We are exposed to risk of loss if securities prices increase prior to closing the transactions. We control our exposure to price risk from short sales through daily review and setting position and trading limits. We manage our risks associated with the aforementioned transactions through position and credit limits, and the continuous monitoring of collateral. Additional collateral is required from customers and other counterparties when appropriate.

We have accepted collateral in connection with resale agreements, securities borrowed transactions, and customer margin loans. Under many agreements, we are permitted to sell or repledge these securities held as collateral and use these securities to enter into securities lending arrangements or to deliver to counterparties to cover short positions. At June 30, 2018, the fair value of securities accepted as collateral where we are permitted to sell or repledge the securities was \$2.6 billion and the fair value of the collateral that had been sold or repledged was \$514.3 million.

## STIFEL, NICOLAUS & COMPANY, INCORPORATED

### Notes to Consolidated Statement of Financial Condition (Unaudited) June 30, 2018

#### NOTE 14 – Related Party Transactions

We have a sweep arrangement with Stifel Bank, a wholly-owned subsidiary of the Parent, whereby a portion of available funds in customer brokerage accounts are automatically transferred by our Company into money market deposit accounts at Promontory, of which Stifel Bank retains a portion of the funds as deposits. Stifel Bank held \$13.6 billion of our brokerage clients' deposits at June 30, 2018.

We serve as a carrying broker-dealer and clear security transactions on a fully disclosed basis for several of our affiliates. These affiliates include KBW, Inc. and Century Securities Associates, Inc. At June 30, 2018 amounts due to affiliates for these services was \$51.2 million and is included in payables to brokers, dealers, and clearing organizations in the accompanying statement of financial condition.

At June 30, 2018, amounts due to our Parent primarily consist of stock-based compensation that is paid upon conversion of stock units and amortization of forgivable notes. The amount due to Parent at June 30, 2018 was \$124.0 million. Due to affiliates of \$56.1 million at June 30, 2018 consists primarily of operating expenses that were paid on the Company's behalf by certain affiliates. These payables are included in due to Parent and affiliates, net in the accompanying statement of financial condition.

At June 30, 2018, the amount due from our Parent was \$37.1 million, which primarily related to income tax transactions between Stifel and the Parent. At June 30, 2018, the amount due from affiliates was \$7.5 million. Amounts owed the Company primarily consist of operating expenses that were paid on behalf of affiliates. These receivables are included in due from Parent and affiliates, net in the accompanying statement of financial condition.

We have a committed, secured Credit Agreement with Stifel Bank. At June 30, 2018, we had no advances on our revolving credit facility and were in compliance with all covenants. See Note 7 for further discussion of our short-term borrowings.

We have an intercompany loan with the Parent, at a rate equal to the Prime Rate plus 0.25%. Our peak borrowing on the intercompany loan was \$120.0 million during the six months ended June 30, 2018. At June 30, 2018, we had \$20.0 million outstanding on our intercompany loan, which is included in due to Parent and affiliates, net in the accompanying statement of financial condition.

During the six months ended June 30, 2018, our Board of Directors authorized and paid dividends of \$15.0 million to the Parent.

#### NOTE 15 – Variable Interest Entities

We have formed several non-consolidated investment funds with third-party investors that are typically organized as limited liability companies ("LLCs") or limited partnerships. These partnerships and LLCs have net assets of \$221.7 million at June 30, 2018. For those funds where we act as the general partner, our company's economic interest is generally limited to management fee arrangements as stipulated by the fund operating agreements. We have generally provided the third-party investors with rights to terminate the funds or to remove us as the general partner. In addition, our direct investment interest in these entities was insignificant at June 30, 2018.

For the entities noted above that were determined to be VIEs, we have concluded that we are not the primary beneficiary and therefore are not required to consolidate these entities. Additionally, for certain other entities we reviewed other relevant accounting guidance, which states the general partner in a limited partnership is presumed to control that limited partnership. The presumption may be overcome if the limited partners have either: (1) the substantive ability to dissolve the limited partnership or otherwise remove the general partner without cause, or (2) substantive participating rights, which provide the limited partners with the ability to effectively participate in significant decisions that would be expected to be made in the ordinary course of the limited partnership's business and thereby preclude the general partner from exercising unilateral control over the partnership. If the criteria are not met, the consolidation of the partnership or limited liability company is required. Based on our evaluation of these entities, we determined that these entities do not require consolidation.

**STIFEL, NICOLAUS & COMPANY, INCORPORATED**

**Notes to Consolidated Statement of Financial Condition (Unaudited)  
June 30, 2018**

**NOTE 16 – Subsequent Events**

We evaluate subsequent events that have occurred after the statement of financial condition date but before the statement of financial condition and related notes were available to be issued. There are two types of subsequent events: (1) recognized, or those that provide additional evidence about conditions that existed at the date of the statement of financial condition, including the estimates inherent in the process of preparing the statement of financial condition, and (2) non-recognized, or those that provide evidence about conditions that did not exist at the date of the statement of financial condition but arose after that date. Based on the evaluation, we did not identify any recognized subsequent events that would have required adjustment to the consolidated statement of financial condition; however, we identified the following non-recognized subsequent events:

*Dividends to Stifel Financial Corp.*

In July 2018, we declared and paid a dividend to the Parent in the amount of \$15.0 million.

*Revolving Credit Facility with Stifel Bank*

As of June 30, 2018, the Company had two lines of credit with Stifel Bank for \$237.0 million and \$53.0 million, respectively. In July 2018, the Company's \$237.0 million revolving credit facility with Stifel Bank was closed and the \$53.0 million revolving credit facility was increased to \$130.0 million. The borrowings are collateralized by company-owned securities and receivables.

\*\*\*\*\*

A current copy of our consolidated statement of financial condition filed pursuant to Rule 17a-5 of the Securities Exchange Act of 1934 is available for examination at the Chicago regional office of the Securities and Exchange Commission or at our principal office at One Financial Plaza, 501 North Broadway, St. Louis, Missouri 63102.
